

## What is an AMP Session?

The AMP Session is a one-hour meeting approximately one week after the ministry presentation. The ministry Executive Director, coaches, and other interested Amplify partners gather to deep dive and discuss the ideas that were generated from the facilitated brainstorming sessions following the presentation.

The Ministry Director is encouraged to lead the AMP Session, beginning with any questions the summary report created, inviting additional thoughts/ideas, and finally narrowing the conversation down to identifying tangible next steps in working toward addressing the challenge issue and moving toward the next stage of growth for your organization.

Amplify partners and coaches come prepared to listen, dig deeper, and help guide the creation of an action plan for the Ministry Director. Interested partners may initiate one-on-one conversations with the ministry Director following the AMP Session to provide continued support.

### How it Works:

- The AMP Session date will be scheduled with the Ministry Director during the final coaching session. Typically this meeting is held one week after the presentation.
- All Amplify partners will have the opportunity to sign up to attend the AMP Session at the bi-monthly meeting and through an email invitation.
- Amplify will provide all guests who have registered for the AMP Session with a Summary Report of the feedback that was provided during the presentation.
- Amplify staff will kick off the AMP Session with prayer and turn it over to the ED to dig deeper in the areas they want to explore.

### Preparation for the ED:

- Review the detailed summary reports with feedback from business leaders who heard your presentation. This feedback report will be provided to you by email within a few days of your presentation.
- Identify questions the report created along with the ideas and connections you would like to explore in more detail.
- Consider what steps you might take in the next 90 days and be prepared to discuss a 90 day action plan during the AMP Session.

Following the AMP Session, Amplify will offer you a mentor to help provide accountability and support in executing your action plan.
